

Department of Creative Product Design

Cultivation

- Emphasis on both theory and practice to cultivate design professionals.
- The department of Creative Product Design established in 2005, devotes to cultivate students' product designing and commercializing capabilities and let our students become product design professionals equipped with multi-disciplinary abilities and an international perspective.

Features

- Superior learning environment to reinforce product developing skill
- With a quality teaching and implementing environment, our department provides advance facilities to strengthen students' practical design skill. And to fully meet the industrial needs, we aim at developing students' ability on Senior Citizen Product Design, Metal and Wood Cultural Creative Design, and Intellectual living Product Design.

Awards & Remarks

- Teacher-student accomplishment for a golden medal training base
- Our department is described as a gold medal training base. In recent years, our students have had fruitful achievements. In addition to winning a number of national and international design competition awards, they won a gold medal and a silver medal in jewellery design in the 49th National Skills Competition (Central District). A gold medal and a masterpiece in its finals in the same year.

Prospects

- Solid professional training for a bright future.
